

DUAL LOAD WHEEL KITS

COMPLETE KITS FOR THE JOB

Dual Load Wheel Kits are available from *Raymond Parts™*.

The dual wheel kits are available for use on Models 7400, EASi™ Reach and 102XM pallet trucks. The use of dual load wheels results in less coning, less wear and less repair. With better handling, the dual load wheel kits have a longer work life compared to the use of one standard load wheel.

For improved handling and less wear, use the Dual Load Wheel Kits from Raymond Parts.

Part Number	Description
1114891/KIT	Dual Load Wheel Kit, includes two tan colored wheels with single shield greaseable bearings for Models EASi™ & 7400 Reach
1114891/KITGL	Dual Load Wheel Kit, includes two tan colored wheels with double sealed greaseless bearings for Models EASi™ & 7400 Reach
1114889/001	Axle, open style wheel plates
