

RAYMOND FORK-TIP LASER GUIDE

===== TAKING PRODUCTIVITY TO NEW HEIGHTS =====

Maximize operator productivity and improve fork placement accuracy with the Fork-Tip Laser Guide from Raymond.

The Raymond Fork-Tip Laser Guide automatically projects a powerful laser line onto the pallet showing *Reach-Fork*[®] truck operators how to more precisely and confidently place pallets in storage racks.

Only Raymond offers two laser color choices. The standard red Fork-Tip Laser Guide is easily visible up to 300", while our more powerful green Fork-Tip Laser Guide can be easily seen at 442", enabling you to maximize your warehouse space and fully utilize the capabilities of your *Reach-Fork*[®] truck fleet.

The green laser is ideal for applications that use blue painted pallets, brighter environments or taller rack heights.

The green and red lasers draw only two amps from the truck battery, enabling battery power to operate at optimum levels.

For quicker pallet pick-up or put-away the Raymond Fork-Tip Laser guides work for your business.

RAYMOND

FORK-TIP LASER GUIDE SPECIFICATIONS

Lasers are Class II by CDRH Standards. Class II lasers are low emission devices and should not be used illogically. The yellow caution decal (as shown) is affixed to the Fork-Tip Laser Guide and is confirmatory of its nature and function.
