## OPERATOR TRAINING WITH A DIFFERENCE

### *Safety On The Move*®

The Raymond Corporation's lift truck operator training program has helped employers protect their people, equipment, and materials since its introduction in 1991. Studies have shown that effective operator training, such as that provided by the *Safety On The Move* program, can help improve your bottom line. It can assist you in reducing accidents, equipment downtime, and product damage, and increase worker productivity and customer satisfaction.

The *Safety On The Move* program can help you comply with the Occupational Safety and Health Administration (OSHA) requirement that all operators of industrial lift trucks be trained and certified in the use of their equipment before being allowed to operate it as part of their job. Raymond's *Safety On The Move* program can also assist you in complying with applicable lift truck operator training requirements in Canada and Mexico.
